

Two Sides Facts

Colleges and Universities with Paper Science Programs

This list from *Paper Age* provides links to colleges and universities with paper science programs in the United States, Canada and around the globe.

NORTH AMERICA

Auburn University

The missions of the Pulp and Paper Research and Education Center (PPREC) are to provide undergraduate, graduate, and continuing education in science and engineering areas relevant to the pulp, paper, and allied industries' long-term development; and to supply technical information to the pulp, paper, and allied industries' operations sector.

Alabama Southern Community College

Center for Forestry, Paper & Chemical Technology.

Institute of Paper Science & Technology

The Institute is an independent, privately supported institution devoted to education and research in engineering and the natural sciences, particularly as applied to the pulp and paper industry.

University of Maine

Chemical Engineering Department.

McGill University

The teaching and research unit called the Pulp and Paper Research Centre, McGill is a partnership of the Pulp and Paper Research Institute of Canada (Paprican), McGill University and government.

Miami University (Ohio)

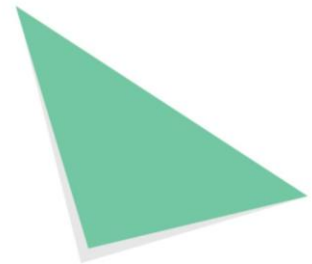

Paper Science and Engineering Program prepares liberally educated, articulate, and skilled engineers for leadership positions in the pulp and paper and other related industries.

University of Minnesota

The Wood and Paper Science Department, in the College of Natural Resources at the University of Minnesota, conducts teaching, research, and extension programs in the areas of forest products and wood science and paper science and engineering.

Two Sides Facts

Mississippi State University

The Department of Forestry at Mississippi State University is responsible for teaching, research, and extension programs relevant to the management and use of the resources of forest ecosystems.

State University of New York (SUNY)

The Paper Science and Engineering program at the State University of New York (SUNY) provides a broad base of study to prepare men and women for professional positions in the pulp and paper industry.

University of Texas

Within the University of Texas is the Cellulose Electronic Network (CEN). The Network's main goals are to provide a cellulose communication resource network for scientists, researchers, the business community, government, and academia.

University of Toronto

The Pulp & Paper Centre at the University of Toronto strives to stimulate research in the science and engineering of the manufacture of pulp and paper products, and to encourage collaborative research with industry partners.

University of Washington

The school's College of Forest Resources provides students with a premier educational and training experience in integrated natural resource management, utilization, and environmental sciences and stewardship.

Virginia Polytechnic Institute and State University

The Department of Wood Science and Forest Products provides students with a personal and unique education, which focuses on how to extend our wood resources for the benefit of society.

Western Michigan University

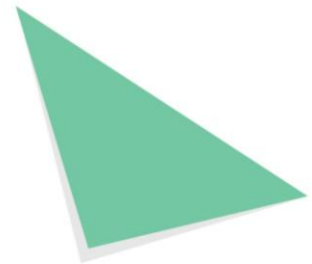

Western Michigan University's Department of Paper Science & Engineering is recognized as a world wide leader in the research of Paper Coatings, Paper Recycling, Printing Inks, Non-Wood Fibers, and Printing. The Department has recently added a Chemical Engineering program and a PhD program.

University of Wisconsin-Stevens Point

The UWSP Paper Science and Engineering program is committed to preparing students for successful technical careers in the pulp, paper and allied industries. Students in this program study mathematics, chemistry, physics, and engineering as well as the science and technology associated with the manufacture of pulp and paper.

Two Sides Facts

EUROPE

Abo Akademi University

The Laboratory of Paper Chemistry offers pre-graduate courses in all aspects of papermaking, i.e. paper technology, paper chemistry, paper physics, pigment coating, paper and board converting, and graphic art. Post-gradual courses include: paper chemistry, pigment coating chemistry, and pigment coating technology. Located in Finland.

Helsinki University of Technology

The Department of Forest Product Technology offers university-level teaching and research on every aspect of forest products technology, i.e. the processing of wood from forest to construction materials, printed paper and board. Located in Espoo, Finland.

University of Joensuu

The Faculty of Forestry focuses its research on the boreal forest ecosystem, Finland's principal natural resource and trains experts, graduate foresters, in the study, management, protection and utilisation of this natural resource. Located in Joensuu, Finland.

Technical University of Lodz

The Institute of Paper Making and Paper Machines at the University offers education and professional advancement of engineers specialized in papermaking. The Institute also offers research activity in the field of pulp and paper making and related branches, including both technology and equipment of pulp, paper and paper converting mills. Located in Poland.

The University of Science and Technology in Manchester (UMIST)

The Department of Paper Science. Located in the United Kingdom.

Institute of Paper

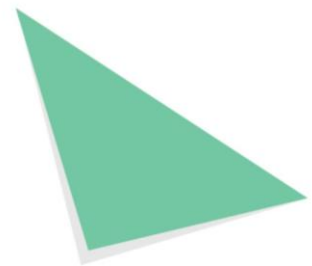

An organisation representing the interests of individuals pursuing a career within the Paper Industry. Located in Surrey, United Kingdom.

Tampere University of Technology

Education in paper and paper board converting, technology and products. Also offers an international programme for gaining an International Ph.D. degree in pulp and paper science and technology. Located in Tampere, Finland.

Two Sides Facts

University of Oulu

The Department of Industry Engineering provides education for various fields of industry such as wood-processing, mining and chemical. Located in Oulu, Finland.

Technical University of Catalonia

A public institution for higher education and technology. Departments include Textile and Paper, and Chemical Engineering. Located in Barcelona, Spain.

ASIA/AFRICA/AUSTRALIA

The Australian Pulp and Paper Institute

An educational and research centre within the Department of Chemical Engineering, Monash University, Clayton campus. The Institute is sponsored by the Pulp and Paper Manufacturers Federation of Australia, with funding and student commitments from its member companies.

Univeristy of Tasmania

Pulp and Paper Research Group with the University's School of Chemistry.
